

Jasper City Schools

Lost/Damaged/Stolen iPads

If the iPad is unaccounted for during the school day, the student must report the matter to the main office immediately. All iPads are equipped with tracking software, which will be used to locate missing iPads. It may be the responsibility of the student and family to recover the lost iPad once the location is identified. If necessary the district and the Jasper Police will assist in recovery.

Outside of the regular school day, the parent should report to the Jasper Police Department any cases of theft, vandalism, or other criminal acts.

If the iPad is damaged, please complete a repair form and bring the iPad to the school library media center. No iPads will be accepted for repair without a completed and signed repair form. Never leave the iPad in the library media center without giving it directly to the library media specialist.

All repairs will be processed as quickly as possible. A district loaner iPad will be provided until the student's iPad is fixed. If the iPad is experiencing technical difficulties outside of regular school hours, the student will need to wait until he/she returns to school to have the iPad fixed. Frequent damage to the iPad can result in losing take-home privileges.

If the two-part cord and plug are lost, stolen, or damaged, the student is responsible for purchasing an OEM (original equipment manufacturer) replacement from the Apple store.
